**WHO'S THE BEST?**

## Alginate Alternative

Automix

### freealgin

Polyvinylsiloxane (PVS) -  
Thixotropic (does not run) material.  
Medium body fast set, tropical flavor  
Hydrophilic, A-silicone with silicone stability and  
alginate elasticity for all alginate indications  
(impressions for temporary crowns & bridges  
(Acrytemp), and for orthodontics). Also suitable for  
preliminary impressions, antagonist models, surgery  
impressions, bites, surgical guides and masks for  
whitening solutions. Recommended using the  
monophase technique for removable prostheses.

**VPS color changing Impression  
System Fast Setting *NEW!!!***
